ANCHOR RETRIEVAL RING

Part	Material
S-0147	316 SS

The anchor retrieval ring is one of the components of a buoy/ring anchor retrieval system. This system makes it easier to retrieve the anchor by using this ring (with a snap hook) and a buoy to do the hard lifting. Attach the components and buoy to the anchor line, motor towards the anchor, the buoy will submerge and then pop to the surface with the anchor attached. Use with S-1111 Spring Loaded Snap Hook.

WHITECAP OFFERS STANDARD AND LOW PERMEATION FUEL LINE ASSEMBLIES. STANDARD FUEL LINES INCORPORATE A HIGH-QUALITY BRAIDED NYLON INNER HOSE COVERED BY A UV RESISTANT RUBBER HOSE, THE INDUSTRY STANDARD. LOW PERMEATION FUEL LINES MEET THE NEW STANDARDS AND REGULATIONS ESTABLISHED BY THE EPA TO FURTHER LIMIT ALLOWABLE EMISSIONS FROM BOTH GASOLINE AND DIESEL ENGINES. HYDROCARBON VAPORS HAVE ALWAYS ESCAPED OR PERMEATED INTO THE ATMOSPHERE THROUGH THE BODY OF THE FUEL LINE AND HAVE BEEN DEEMED ALLOWABLE EMISSION. HOWEVER, THE PERMEATION OF THESE ALLOWABLE EMISSIONS HAS BEEN REDUCED FROM 5506/M²/DAY TO 156/M²/DAY. OUR LOW PERMEATION FUEL LINES MEET THIS REQUIREMENT AS WELL AS THE REQUIREMENTS FROM THESE AGENCIES: CALIFORNIA AIR RESOURCES BOARD (CARB), ENVIRONMENTAL PROTECTION AGENCY (EPA), MEETS SAE J1527 REQUIREMENT.

- FUEL LINE ASSEMBLIES INCLUDE 3/8" PRIMER BULB
- HOSE IS 3/8" I.D., AND 7 FT. LONG

Compression handles reduce and eliminate noise and rattle from hatches when the boat is underway. The compression function allows the hatch to compress and create a watertight seal. Bodies are available in both black and white nylon with your choice of handle in: Chrome-Plated Zinc, 316 Stainless Steel, and Nylon.

Chrome-Plated Zinc parts should be installed on freshwater boats only.
